Personal Statement

A driven 2nd year undergraduate student looking to earn experience in the IT/Software branch as well as in Business & Data Analysis. Although I yet to possess any work experience, I believe I make it up with my hard-working spirit as well as with my enthusiasm to constantly learn new skills and self-development passion. During my education, I prioritized my studies as well as making sure all of my works were in the right standard. When I find a subject that I enjoy, I become obsessed with learning as much as I can about it as well as trying to occupy myself with different variations of it. I believe that the goals I set for myself are instantly translated to a commitment.

Education

Doukas School | Marousi, Greece | **2007-2021**(Graduation)

Athens University of Economics and Business, Dept of Management Science and Technology | Athens, Greece | 2021 – present(Expected Graduation: 2025)

MPOURDAKOS, ILIAS

CURRICULUM VITAE

Interests

From a young age I started finding interests in the Computer Sciences, and more specifically, programming, when I started completing small projects in python. During my education in the Department of Management Science and Technology, I achieved the pleasure of extending those interests further as well as adopting new ones, like Data Bases and Data analysis, statistics, and Business analytics. I am constantly trying to educate myself in these topics by practicing with doing different projects(that I started on my own or with a team), as well as attending seminars and workshops that cover them. I am eager to earn more experience in these branches of CS but in a lot more!

Participations

Currently a part of the ThinkBiz Team | 2022 – present

Skills

- ✓ Fluent in Greek and English
- ✓ Proficiency in the English language given to me by the University of Michigan
